(a) activation functions
sigmoid
ReLU
leaky ReLU ($\alpha = 0.1$)
$f(z)$
z
(b) derivatives
sigmoid
ReLU
leaky ReLU ($\alpha = 0.1$)
$\max\sigma' = 1/4$
$f'(z)$
z
(c) output error
sigmoid + cross entropy (matched)
sigmoid + MSE (mismatched)
linear + MSE (divided by 10)
$a < 0.1$: confidently wrong
$|\delta^L|$
output pre-activation z (target $y = 1$)
